NIKOLA IVANDJIKOV

Front-end developer

👤 PROFILE

Hello! My name is Nikola and I am 27 years old. In 2019 I graduated with a Bachelor's degree in Software Technology and Design at Plovdiv University "Paisii Hilendarski", and since the beginning of 2021 I have been taking courses at SoftUni with a specialty JS Web Developer, and I have certificates for the successfully completed modules. Back as a student, I started to practice and work in the IT field.

📇 WORKING EXPERIENCE

Team Lead - Content Entry

Laptop.bg - Remote   Mar 2021 - Present

My main duties are - the optimal distribution of tasks among my teammates, monitoring the quantity of uploaded products and meeting the given deadlines. Once every week, I hold online meetings with the team in order to better communicate and resolve any issues that arise in their work. This also helps me in keeping correspondence between my team and the developers to integrate new features, making the work of the Content Entry department easier. I've created special photoshop actions for a quick and easy image resize with a single click. I also work with the product managers to optimize the filters and categories on the site.

- Taking responsibility
- Meeting deadlines
- Teamwork

Front End developer/Landing page creator

Laptop.bg - Remote   Jan 2020 - Present

My main duty is to produce product landing pages using materials from product manufacturers. I have done over 200+ projects in this position. I also design and produce SVG images that we use as stickers on the most requested product pages. Since the beginning of 2022, I have been working on the design of the Laptopmedia.com website, with the main goal being a fully responsive design. Thanks to the framework Tailwind.css I was able to achieve very good results and even managed to reduce Cumulative Layout Shift (CLS) to 0.

- Over 200+ created landing pages
- Experience with multiple JS and CSS libraries such as AOS, Swiper, Slick slider, simpleParallax.js, jQuery Reel, FancyApps, Gsap, etc.
- Experience with Adobe Photoshop, Adobe XD, Figma
- Good UX/UI thanks to the experience I draw from the best in the field (ASUS, MSI, Apple, etc.)

Content Entry

Laptop.bg - Remote   Jun 2018 - Jan 2021

My main duties are keeping track of available products on the suppliers' websites and uploading them to the Laptop.bg admin. When uploading products I sometimes encounter a discrepancy between the features provided by the distributor and the manufacturer. In such situations I take initiative by searching for information from reliable sources and watching video reviews. I work with image banks from manufacturers and search for images on the internet when necessary. As an additional job, I translate product landing pages from English into Bulgarian.

- Experience with searching for information on the Internet (googling)
- Keeping up with the latest technologies
- A good level of English

Content Entry - Internship

Laptopmedia.com - office in Plovdiv   Jul 2017 - Oct 2017

I work with the Wordpress interface and upload laptops to the newly built Laptopmedia catalog, taking the spec information from Amazon.com. Also a part of my job is adding series and resizing images.

- Experience with Wordpress
- Working in an office environment
